EMMANUEL SEUN SHITTU

Full-Stack Engineer | Frontend · Backend · Mobile · Fintech
shem4soul@gmail.com | 08055992911, 07036613047 | Lagos, Nigeria
linkedin.com/in/emmanuel-shittu91573915a | github.com/shem4soul

PROFESSIONAL SUMMARY

Full-Stack Engineer with years of experience building full-stack web and mobile products for payments, fintech and multi-tenant SaaS. Works across the stack with React, Next.js, React Native and Expo on the front end and TypeScript, Node.js, Express and NestJS on the back end. Has shipped live payment flows across Paystack, Monnify and crypto gateways, secured systems with JWT/RBAC, and improved performance by 30–75% through caching, indexing and query optimization. Experienced in system automation and cloud delivery: CI/CD with GitHub Actions, AWS deployments, Docker, and Kubernetes (KCNA certified); AWS Certified Cloud Practitioner in progress.

CORE SKILLS

Frontend & Mobile	React.js, Next.js, React Native, Expo, TypeScript, JavaScript (ES6+), Tailwind CSS
Backend & Architecture	Node.js, Express.js, NestJS, Java, Spring Boot, REST APIs, Microservices, Event-Driven Systems
Payments & Integrations	Paystack, Monnify, Crypto Gateways, Webhook Processing, Idempotent API Design
Databases & Caching	PostgreSQL, MongoDB, MySQL, H2, Redis (caching & queues), Query Optimization, Indexing
Cloud & DevOps	AWS (EC2, S3, VPC, RDS, KMS, Systems Manager), Docker, Kubernetes (KCNA certified), GCP (Cloud Run, Pub/Sub), Linux
Automation & CI/CD	GitHub Actions CI/CD, Workflow Automation, Background Jobs (Redis queues, BullMQ), FFMPEG Video Processing
Security	JWT, RBAC, OAuth2, Rate Limiting, Secure API Design
Testing & Tools	Jest, Supertest, Mockito, Maven, Swagger/OpenAPI, Postman, Git, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | Divnerix Innovations **Dec 2025 – Present**
Remote, Nigeria

- Own the backend for live payment, donation and event platforms in TypeScript, Node.js and Express.js, from API design through deployment.
- Build and ship cross-platform iOS and Android applications with React Native and Expo in TypeScript, from feature development through release.
- Integrate mobile clients with the platform REST APIs, including authentication, role-based access and secure session handling.
- Develop fintech features for payment and transaction workflows, including payment processing and webhook-based transaction confirmation across multiple gateways.
- Contribute to geospatial features for location-aware applications, working with location data across the backend and mobile app.
- Automate build and deployment workflows with GitHub Actions CI/CD and manage AWS infrastructure, containerizing services with Docker.
- Collaborate with product and engineering teammates to turn requirements into delivered features, and review code to keep quality high.

Backend Engineer | Divnerix Innovations **Jan 2025 – Nov 2025**
Remote, Nigeria

- Designed and secured REST APIs processing real transactions via Paystack and crypto payment gateways, with webhook-based payment confirmation.
- Implemented JWT authentication and role-based access control (RBAC) across multi-tenant, organization-based systems.
- Built event-driven background workflows on Redis queues for reliable asynchronous processing at scale.
- Improved API performance by up to 40% through caching, query optimization and data-model improvements under high traffic.
- Set up CI/CD pipelines and managed deployments on AWS infrastructure.
- **Key deliverables:** multi-gateway donation platform with webhooks; event and content management system with RBAC; multi-tenant architecture.

Backend Lead (Volunteer) | ScholarGuide (EdTech Startup) **Feb 2025 – Oct 2025**
Remote, Nigeria

- Led backend architecture and API design for a multi-role platform serving students, parents, teachers and admins (TypeScript).
- Built a gamification engine (points, badges, leaderboard) and multi-role JWT/RBAC authentication.

- Designed role-based data models across PostgreSQL, MongoDB and MySQL, with Redis caching for performance.
- Built a search and recommendation system that improved query performance by up to 75%; raised database efficiency through indexing and query tuning.
- Implemented rate limiting and secure API practices; documented APIs in Swagger to support team collaboration.

Full Stack Developer | In-Box Elite Nig. Ltd (Merchandising) **Feb 2022 – Dec 2024**
Benin City, Nigeria

Backend

- Built backend services for product, order and inventory management using TypeScript, Node.js, Express and MySQL.
- Designed RESTful APIs for business operations and automated internal workflows, improving efficiency by 40%.
- Improved API performance by 30% and proposed and implemented a caching layer for frequently accessed product data, lowering average response times.
- Introduced real-time low-stock alerting, reducing stockout incidents and manual stock checks.

Frontend

- Designed and built a custom order-tracking dashboard giving the sales team live visibility of order status, shortening customer-inquiry response time.
- Delivered frontend integration for operational business systems, connecting user interfaces to the product, order and inventory APIs for end-to-end full-stack delivery.

Full Stack Developer (Full-Time Internship) | Edo Job **May 2022 – Dec 2022**
Benin City, Nigeria

- Built and shipped 7+ full-stack applications end to end using React, TypeScript, Node.js, Express and MongoDB, from requirements through deployment.
- Developed and maintained REST APIs for live client-facing features, working directly from product requirements.
- Collaborated with the engineering team in Agile sprints, including sprint planning, standups and code reviews.
- Deployed applications to cloud hosting platforms and managed environment configuration for production releases.
- Fixed bugs and delivered feature requests raised by project leads, iterating quickly on feedback.

Full Stack Bootcamp Trainee (Cohort 5) | Edo Innovate **Mar 2021 – Dec 2021**
Intensive full-stack development program

- Completed intensive project-based training in React, TypeScript, Node.js, Express and MongoDB.
- Built foundational REST API and CRUD apps under mentor guidance; practiced Git/GitHub workflows, pair programming and code review.

SELECTED PROJECTS

- **Payroll System (Monnify)** *(TypeScript, Node.js, PostgreSQL, Redis, BullMQ, Docker)* — bulk payroll disbursement, background workers, JWT/RBAC, idempotent webhooks and reconciliation. github.com/shem4soul/monnify-payroll-api
- **CashNova Mobile App** *(React Native, Expo, TypeScript, Hono, PostgreSQL, Drizzle ORM)* — personal finance and invoice app with wallets, reports and PDF invoices. github.com/shem4soul/CashNova-Mobile-APP-React-Native
- **Payment Parser & Executor API** *(TypeScript, Node.js)* — parses structured payment intents, then validates and executes payment workflows with secure transaction handling. github.com/shem4soul/payment-parser-executor-API
- **SkyStudio (Video Processing Platform)** *(Node.js, JavaScript, FFMPEG)* — video platform serving 1080p and 720p downloads, scaled by FFMPEG to the requested resolution; with user authentication. github.com/shem4soul/Skystudio
- **E-commerce API (NestJS)** *(TypeScript, NestJS, PostgreSQL, TypeORM, Paystack, Docker)* — full-text search, race-safe checkout, signed Paystack webhooks, order state machine, JWT refresh rotation. github.com/shem4soul/nest-ecommerce-api
- **Box Dispatch Service (Remote Delivery Boxes)** *(Java 17, Spring Boot 3, Spring Data JPA, Bean Validation, H2, Maven, Mockito, MockMvc, Postman)* — delivery-box REST API with a state machine, 25% battery rule, weight limits, 409/422 errors and tests. github.com/shem4soul/Remote-Delivery-Box-Management-Java
- **Other backend projects:** School Management API; Social Network Blog; SQL E-commerce API; Jobster API.

CLOUD, DEVOPS & AUTOMATION

- **System automation:** internal workflow automation (40% efficiency gain) and low-stock alerts at In-Box Elite; FFMPEG video processing in SkyStudio; Redis and BullMQ job queues in the payroll API.
- **AWS hands-on labs:** VPC and subnet design, KMS encryption, EC2 software management and RDS MySQL. VPC | KMS | EC2 | RDS

EDUCATION

B.Sc. Banking and Finance — University of Benin, Benin City Oct 2018
National Diploma, Business Administration — Abraham Adesanya Polytechnic, Ijebu Igbo 2007 – 2010

CERTIFICATIONS

- **KCNA (Kubernetes and Cloud Native Associate)**, Linux Foundation; **AWS Certified Cloud Practitioner** (in progress)
- **Also:** Backend Development (Node.js), CareerEx; Python and Statistics for Financial Analysis
